RIC

New Citroën ë-SpaceTourer 100% electric and Citroën SpaceTourer both offer the same fantastic features when it comes to modularity, interior space, boot volume and driver assistance systems, but New Citroën ë-SpaceTourer provides a shorter-length option and access to the increasing number of town centre low emissions zones. New Citroën ë-SpaceTourer 100% electric has everything you want, making it the perfect companion.

RANGE OF UP TO
240 KM**

100KW
(136 HP) MOTOR

50KWH BATTERY
FAST CHARGING TO 80% IN 30 MIN

** Range of 240 km
with 50kWh battery WLTP standard.

TWO LENGTHS

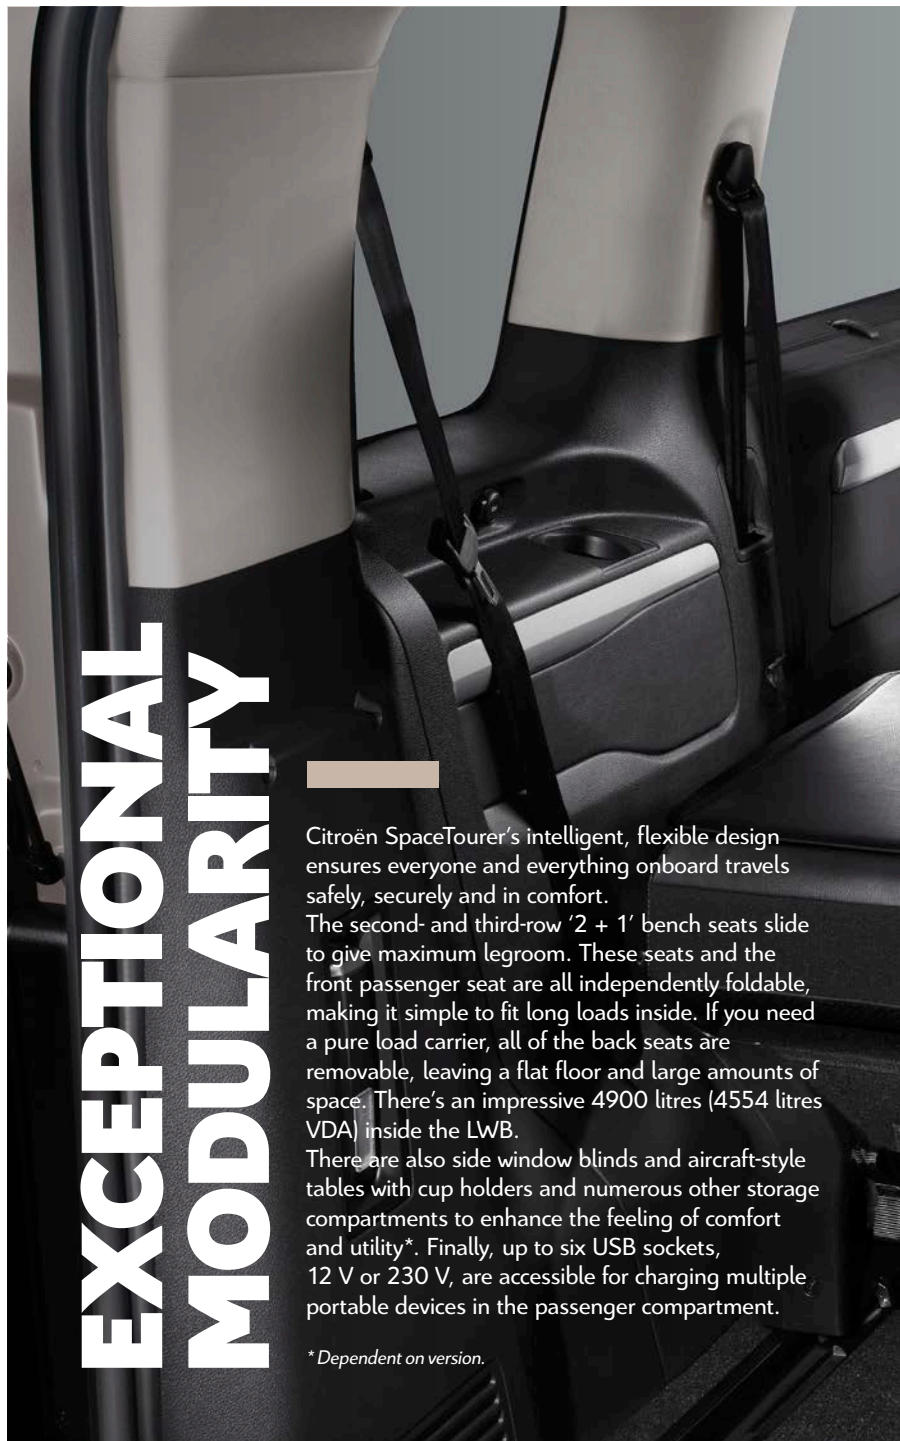

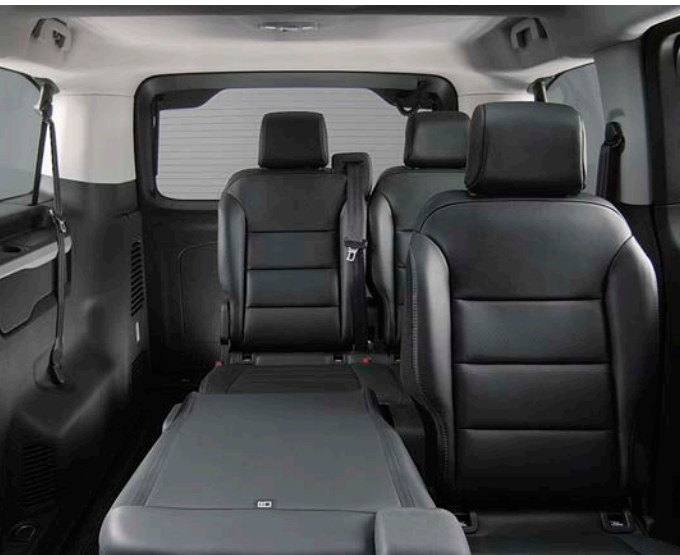

Thanks to its modular platform, Citroën SpaceTourer comes in two lengths: MWB (4.95m) and LWB (5.30m).

AVAILABLE IN 100% ELECTRIC

MWB **LWB**

EXCEPTIONAL MODULARITY

Citroën SpaceTourer's intelligent, flexible design ensures everyone and everything onboard travels safely, securely and in comfort.

The second- and third-row '2 + 1' bench seats slide to give maximum legroom. These seats and the front passenger seat are all independently foldable, making it simple to fit long loads inside. If you need a pure load carrier, all of the back seats are removable, leaving a flat floor and large amounts of space. There's an impressive 4900 litres (4554 litres VDA) inside the LWB.

There are also side window blinds and aircraft-style tables with cup holders and numerous other storage compartments to enhance the feeling of comfort and utility*. Finally, up to six USB sockets, 12 V or 230 V, are accessible for charging multiple portable devices in the passenger compartment.

**Dependent on version.*

AVAILABLE IN 100% ELECTRIC

BOOT VOLUME

Citroën SpaceTourer Business provides 700 litres (655 litres VDA) of boot space. You can increase that even further by removing the third-row seats to provide 2300 litres (2228 litres VDA), or to a cavernous 4200 litres (3968 VDA) by removing the second-row seats too.

— AVAILABLE IN 100% ELECTRIC —

AVAILABLE IN 100% ELECTRIC 

USEFUL EVERY DAY

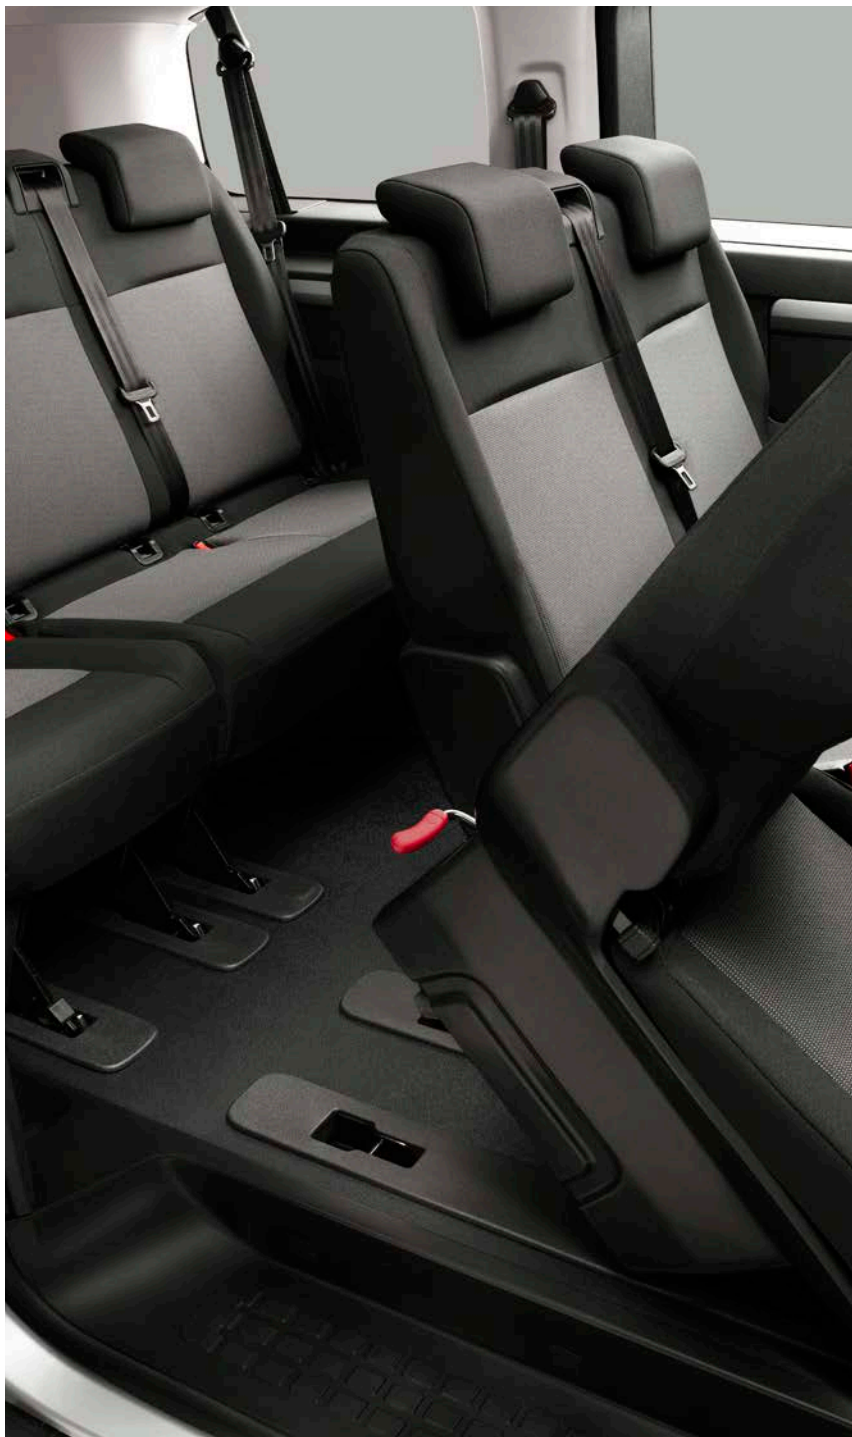

WORRY-FREE CAR PARK ACCESS

With a height of 1.90m* from road to roof, Citroën SpaceTourer Business lets you use city car parks, underground parking, shopping centres and airport facilities without worrying about height restrictions.

EASIER ACCESS TO ROW THREE

Citroën SpaceTourer Business offers up to nine seats on board. To make access to the third row of seats easy, the second row of seats can be folded with a single movement to create a wide opening.

** Dependent on version.*

CONNECTIVITY

CITROËN CONNECT NAV

Citroën SpaceTourer gives you advanced technologies which make driving easier. The 7" colour capacitive touchscreen connects you to all of the car's functions, your media, phone and navigation. Citroën Connect Nav with voice control* brings you a wealth of real-time traffic information, the location of fuel stops and prices, car parks⁽¹⁾ and even the latest weather. A 'Speed Camera Alert' option sends audible and visible alerts throughout your journey, whilst the Visio Park180° system* displays an aerial view of the rear part of the car to help you park precisely in even the tightest spots.

CITROËN CONNECT ASSIST

Help whenever and wherever you need it with a Geolocated Emergency and Assistance Call system, free of charge, without subscription and available 24/7. The appropriate emergency services are called, either automatically or by pressing the "SOS" or "Assistance" button in the vehicle.

CITROËN CONNECT PLAY

With the Mirror Screen function you can enjoy your smartphone safely, controlling compatible apps through the 7" touchscreen using Apple CarPlay™ or Android Auto⁽²⁾.

** Available as an option.*

(1) Only information from partners can be displayed.

(2) Depending on smartphone model. Additional terms and conditions apply on connected services, including customer acceptance of location sharing prior to activation.

CITROËN CONNECT PLAY

DIESEL POWER

Each of Citroën SpaceTourer's four available engines has BlueHDi diesel technology. This new generation of engines dramatically reduces emissions of nitrogen oxides (NOX), while also reducing CO₂ emissions and fuel consumption.

The EAT8 (Efficient Automatic Transmission 8-speed) automatic gearbox combines driving pleasure with environmental efficiency. Thanks to Quickshift technology it provides fast and fluid gear changes, offering exceptional dynamism and driving pleasure, both on main roads and in town. By optimising the gear-change speeds, the EAT8 automatic gearbox makes it possible to achieve fuel consumption and CO₂ emissions amongst the lowest in the category.

ELECTRIC POWER

Instant torque is the secret to the smooth performance of New Citroën ë-SpaceTourer 100% electric. The electric motor provides power of 100kW, the equivalent of 136hp, and a maximum speed of 130km/h. Three driving modes let you tailor performance to your mood or need: Normal is the best compromise between range and dynamic performance; Eco optimises energy consumption; and Power delivers an identical performance to the unladen vehicle, even when fully loaded.

The lack of noise and vibration makes Citroën ë-SpaceTourer particularly comfortable, whilst the selector on the centre console makes it easy to control the Park, Reverse, Neutral, Drive and Brake functions. "Brake" mode captures regenerative braking energy captured during deceleration, returning it to the traction battery.

**RANGE OF UP TO
330KM WLTP***

**UP TO 80% CHARGE
IN 30 MINUTES****

**BATTERY WARRANTY
8 YEARS / 160,000 KM**

Can obtain 15-80% of the vehicle charge in 30 minutes from a 100kW rapid charging station. Charge at a rate of up to 100kW, depending on the power of a rapid charging station used and will take longer to charge at a lower power.

INTUITIVE INTERFACE

New Citroën ë-SpaceTourer 100% électrique has been designed with one priority: to make its day-to-day use easier. A dedicated instrument panel continuously displays the battery charge status gauge and the power consumption gauge for electrical equipment such as the heating and air conditioning. This is supported by the information the 7" touch screen provides, including among other things, an "Energy" section grouping together all of the information dedicated to the special electrical features of New Citroën ë-SpaceTourer: the energy flow with, in particular, the battery charge level, your consumption statistics and the programming of deferred charging.

STATISTICS : know your electric consumption so that you can optimise your driving.

ENERGY FLOW : view the operation of the electric technology.

DEFERRED CHARGING : programme charging to start at the time you choose.

EASY RECHARGING

Again with the focus on ease of use, New Citroën ë-SpaceTourer 100% electric has three battery charging methods, as well as a complete ecosystem of practical services. The charging flap is located on the front-left wing and incorporates an LED so that you can visually monitor progress. Note that Citroën guarantees the traction battery for eight years or 160,000 kilometres for 70% of its charging capacity.
